

**20
YEARS**

KING HUSSEIN FOUNDATION  **بؤنة الملك الحسين**
JUBILEE SCHOOL **مدرسة اليوبيل**

"We have worked with a number of Jubilee students on their graduation projects, and every single one has shown curiosity and a passion for learning, and also demonstrates teamwork and a high degree of commitment to their work. We are happy to have new groups of Jubilee students this year, as we like to work with the scientists of the future – our future."

Abeer Al-Bawab

**Director of Hamdi Mango Center for Scientific Research
Professor of Physical Chemistry, University of Jordan**

"Across the last decade, I have rarely encountered a group of students that have joined the AUB with such stimulation and dedication... I believe that the Jubilee School is a successful educational experience that should be replicated in every Arab country to produce the leaders of tomorrow. My best wishes for a continuation of such success stories."

Dr. Salim Kanaan

Director of Admissions and Financial Aid, AUB

"They do achieve! Over the years, I have come across several Jubilee School graduates. Some work in the top companies of the world, while others already own companies that are worth millions and are likely to put Jordan on the creative economy map. They are free spirits, creative destructors, and first-class innovators."

**"Jubilee School" by Yusuf Mansur
Jordan Times, April 9th, 2012**

"I have memorable and excellent experiences with the students of Jubilee School. They are very distinguished, creative, and motivated. I have noticed while working with these students that they have a very good background in different fields, in addition to having good personalities that allow them to discuss any issue that is on the table."

Ramez Quneibi

**Web Development Department Manager,
Talal Abu-Ghazaleh Information Technology International**

"We were very privileged to have used the services of a dozen Jubilee school students when we launched our 3.75-gigabyte services last year. We asked them to champion this advanced technology and help us introduce it to the public. The results were amazing! Their capacity to take in the technology was impressive, and so was their ability to interact with the public at the human level in a mature yet informal way."

Sami Jarrar
HR & Corporate Affairs Director, Umniah

"It was an honor to meet with such a great blend of brilliant minds at the Jubilee School. The students there are still in the first steps of their academic future, and I am certain that if they keep going at the same rate, they will have very successful professional lives. Looking at the expectations that they are held to, I am sure that one day they will be a great success."

Loay Abu-Osbeh
Outreach Director, Talal Abu-Ghazaleh University

"The Jubilee students have proved to be innovative learners who are serious about their education. Under the supervision of faculty, they are able to conduct scientific projects using research methodology, demonstrating strong technical and business leadership skills for the future. We offer our heartiest congratulations to Jubilee School on its 20th anniversary and look forward to its success for many more decades to come."

Dr. Issa Batarseh
President, Princess Sumaya University for Technology
